

## **502492 Graduation Project**

[3 cr., -, -] The course is designed to build upon previous research assignments in all upper level accounting modules and provide a capstone experience for accounting majors by challenging them to identify accounting issues, locate and research appropriate accounting concepts, standards, statements, pronouncements or tax authorities, and then provide a thorough analysis for determination of an appropriate conclusion for the decision – making process . communication of such research and analysis will require student to prepare organized/ structured written papers. The instructor follows up student's graduation project step during the module period.
